PIONEERS OF SCIENCE

PIONEERS OF SCIENCE

had its origins in a series of lectures given by **Sir Oliver Lodge** in 1887. Some chapters of the book are devoted to the biographies of some of the best known astronomers, like Copernicus, Brahe, Kepler, Galileo, and Newton. Other chapters go into the details of some scientific discoveries, which are considered standard knowledge today, we hear for example about the discovery of the Asteroids, Neptune, as well as stellar planets, the tides and planetary evolution, and comets and meteors.
